**Non-Residential Mandatory Measures
 Storm Water Pollution Prevention Requirements
CERTIFICATION OF COMPLIANCE**

2013 California Green Code - Chapter 5 (Division 5.1 – Planning and Design) NOTICE: If your non-residential project will require the clearing and grubbing of one acre or more; or you grade, fill, excavate, store or dispose of 350 cubic yards or more of soil or earthy material on the site; or your project is part of a larger common plan of development, this certification document does not apply. In addition to a building permit, you must obtain a separate Grading Permit from the County of Sacramento and meet the requirements of the State of California Construction General Permit. For more details contact the County of Sacramento Department of Land Division & Site Improvement Review at: (916) 874-6873 or DSSLDSIR@SacCounty.net

For projects that do not fall within the above requirements, this “**certification of compliance**” document, shall be included with all “new building” non-residential permit applications and plan submittals starting January 1, 2011.

By signing this document, you are certifying that you, as the permit holder (**OWNER, CONTRACTOR or RESPONSIBLE PARTY**) and all parties working under this permit, will comply with the provisions of the Non-Residential Mandatory Site Development requirements contained in the 2013 CA Green Code. You further certify that you will; prepare and implement an Erosion and Sediment Control Plan that meets the County of Sacramento Land Grading and Erosion Control requirements, and prevent the discharge of pollutants from your site. Failing to comply with County of Sacramento ordinances could result in your project receiving a “Notice to Comply”, a “Notice of Violation”, a “Stop Work Order”, and/or an Administrative Civil Penalty of up to five thousand dollars (\$5,000.00) per day for each violation (See Sacramento County Code – Chapter 15.12, Section 15.12.560). These actions and penalties are exclusive of any potential additional State enforcement for non-compliance.

In addition to the provided information in the entitled “CALGreen Requirements for Non-Residential Development” pamphlet, information on the preparation and implementation of an Erosion and Sediment Control Plan can be found by going to:

<http://www.msa2.saccounty.net/ce/dss/ldsir/pages/improvementstandards.aspx>
